

***ShoEi* Foods walnut grower guidelines**

ShoEi Foods USA is a walnut grower as well as a processor, and consequently we recognize that responsible growers must adapt and implement all necessary safeguards to guard against biological and chemical contamination. *ShoEi* favors crops of the highest possible quality attainable with minimal chemical pesticide and herbicide application. Growers must furnish *ShoEi* with an accurate Pesticide Use Report detailing all chemical treatments throughout the crop year, and all chemicals must be approved for agricultural use by the state of California.

For *ShoEi* growers as well as our own orchards, we endorse the growing and harvesting standards published in the FSMA (Food Safety Modernization Act) FDA produce safety rule. *ShoEi* strictly enforces those standards because they ensure safe products for our customers.
